Debra El-Tawansi

Osteopath

Sydney, New South Wales

Debra is an AHPRA registered Osteopath with over 18 years of experience in clinical practice. She meets each client with a professional and results-based approach to healthcare. Her thorough knowledge of biomechanics, as well as injury assessment and treatment gives her the tools to prevent or help treat injuries in the workplace.

She is passionate about correct ergonomics and creating environments where clients can be free from musculoskeletal strain whilst working. Lifestyle factors will also be considered when assessing the best workstation for client needs.

CWHA Testimonials

"Awesome Manual Handling Training session conducted at our workshop! The training was customised to suit our business and contained a good mix of theory/practical elements. Highly recommended. Thanks again."

"The inner-city business for whom I work as Office Administrator recently engaged CWHA to deliver "Sit Safe" training seminars and conduct ergonomic assessments for all our staff. It was a very worthwhile undertaking. The information imparted in the seminars was interesting and applicable. The individual desk checks were thorough and valuable, as was the subsequent comprehensive report."

"Reps of Corporate Work Health are great at customer service and their responses are prompt and quick. Very accommodating to clients needs and always going above and beyond to find a solution for me and to find a date and time of consultation. Highly recommend them to use for your Ergonomic work health assessments including work from home assessments."
