Shaun Coghlan

Occupational health osteopath

Melbourne, Victoria

Shaun is one of only a handful of osteopaths who has been titled as an occupational health osteopath by Osteopathy Australia. Shaun has a wealth of experience in office workstation and vehicle ergonomics, manual handling training.

Shaun also works in private clinical practice at Principle Four Osteopathy and The Osteopaths in Blackburn.

Shaun is also a lecturer and clinical supervisor at Victoria University.

Away from work Shaun enjoys coaching basketball, jet skiing and playing golf.

CWHA Testimonials

“Awesome Manual Handling Training session conducted at our workshop! The training was customised to suit our business and contained a good mix of theory/practical elements. Highly recommended. Thanks again.”

“The inner-city business for whom I work as Office Administrator recently engaged CWHA to deliver “Sit Safe” training seminars and conduct ergonomic assessments for all our staff. It was a very worthwhile undertaking. The information imparted in the seminars was interesting and applicable. The individual desk checks were thorough and valuable, as was the subsequent comprehensive report.”

“Reps of Corporate Work Health are great at customer service and their responses are prompt and quick. Very accommodating to clients needs and always going above and beyond to find a solution for me and to find a date and time of consultation. Highly recommend them to use for your Ergonomic work health assessments including work from home assessments.”
