## Wade Brennan

Physiotherapist

South East Queensland

Wade is the director of Corporate Work Health Australia and Central Physio and Health on the Gold Coast.

Wade has worked in private clinical practice since 2004 and has an interest in occupational health and strength and conditioning.

Wade provides post graduate training in the areas of occupational health, workplace ergonomics and manual handling.

When not at work, Wade loves spending time with his family, keeping fit and healthy and travelling.

## CWHA Testimonials

"Awesome Manual Handling Training session conducted at our workshop! The training was customised to suit our business and contained a good mix of theory/practical elements. Highly recommended. Thanks again."

"The inner-city business for whom I work as Office Administrator recently engaged CWHA to deliver "Sit Safe" training seminars and conduct ergonomic assessments for all our staff. It was a very worthwhile undertaking. The information imparted in the seminars was interesting and applicable. The individual desk checks were thorough and valuable, as was the subsequent comprehensive report."

"Reps of Corporate Work Health are great at customer service and their responses are prompt and quick. Very accommodating to clients needs and always going above and beyond to find a solution for me and to find a date and time of consultation. Highly recommend them to use for your Ergonomic work health assessments including work from home assessments."
