

VEHICLE ERGONOMICS

Face to Face Ergonomic Vehicle Assessments

Corporate.Work.**Health.**
Australia.

Standard Vehicle Ergonomic Assessment

For Individual without musculoskeletal symptoms

Requirements:

Worker and vehicle must be present to undertake this assessment.

Who Would Benefit From This Assessment?

- Workers who are required to drive for their employer.
- Companies who are looking to raise the awareness and education for drivers to improve their seated work posture and educate them on how to set the vehicle up to suit their specific needs.

The vehicle postural assessment report includes:

- Consultation with the worker regarding any specific issues they have with the vehicle.
- Assessment of the workers current vehicle set up – sitting posture, entering and exiting the vehicle, working within the vehicle, unloading and loading of the vehicle.
- Education and advice on how to adjust the vehicle to improve seated driving posture.
- Reporting on assessment findings, advice and education given.

Investment

Pricing starting at \$250 + GST per assessment.

Vehicle Comparison Assessment (Review 2 or More Vehicles)

Assessment details on comparing vehicles

Requirements:

Worker and 2 or more vehicles to be compared must be made available on the day of the assessment.

Note: If a vehicle needs to be assessed at a dealership the organization will be responsible for coordinating its availability.

Who Would Benefit From This Assessment?

- Workers who are required to drive for their employer.
- Workers with specific musculoskeletal complaints that are impacted by driving the vehicle, working within the vehicle or loading/unloading the vehicle where a decision over a suitable vehicle has not yet been made.
- Companies looking to determine which of 2 or more vehicles best supports a worker with ongoing concerns.
- Companies looking to determine which of 2 or more vehicles is best suited to a particular job role.

The assessment/report includes:

- Assessment/reporting time may require 3-4 hours duration
- Face to face consultation with the worker regarding any specific issues they have with a vehicle.
- Analysis of vehicle features (seat, space, storage, entering/exiting) of one vehicle compared to another whilst considering worker's specific needs, characteristics and job tasks.
